

Diabetes Awareness

Although grant funding was completed 2 years ago, we had sufficient funds to support the program in 2024-25 and 2025-26. I have attached a spreadsheet of the status of the program as of November 2025, for the school year 2025-26. Lions in District 24L need to be proud of how they have changed the face of diabetes in the school systems across the state. We had record usage this year with over 9000 classes taken by November 2025. School districts have enrolled in the program and we had sufficient funds to support a number of school districts this year. If you club would like to support this program in the upcoming 2026-27 school year that would be amazing. The use of this program across the state is truly amazing, and I want to thank the leadership of District 24L for supporting this project and making a difference in the care of children with diabetes.

Regards,

Kathy Gold
