

District 24-L Artificial Intelligence Chair Cabinet Report

2026 24-L Fall Conference – Lion Dan Spidey Visone

Artificial intelligence offers Lions an increasingly powerful way to strengthen every facet of club growth and success. From membership recruitment and retention to service planning, marketing, communications, leadership development, fundraising, and administrative support, AI can help our clubs work more efficiently, communicate more effectively, and devote more of their time to what matters most—serving their communities.

As District 24-L AI Chair, my focus is on helping clubs understand these tools and, more importantly, put them to practical use.

Lions Virtual Resources

I recently developed an article highlighting the use of [LionsVirtual.org](https://lionsvirtual.org) and all four of its components to support activities at the club level. The article provides Lions with practical ideas for leveraging these resources to enhance club operations, engagement, communication, and growth.

The article has been posted on the District 24-L website, valions.org, and I encourage club leaders and District leaders to review and share it with their clubs.

AI Support for District 24-L Clubs

To further support our clubs, I have personally purchased ChatGPT Plus so that I can provide enhanced AI assistance in response to club requests.

Clubs are encouraged to reach out for help with projects such as:

Membership recruitment and retention materials; service project ideas; marketing, social media, flyers and promotional materials; fundraising and sponsorship development; club communications, articles and presentations; leadership and officer resources; and brainstorming or problem-solving for club challenges.

AI should not replace the creativity, experience, relationships, or judgment of our Lions. Rather, it should serve as another tool that helps us amplify those strengths and turn ideas into action more quickly.

As we continue exploring the opportunities AI provides, I encourage clubs to think beyond simply using AI to write something. Consider how these tools can help your club serve more people, tell its story better, attract new members, develop leaders, raise additional resources, and ultimately strengthen the club.

Please feel free to reach out to me with questions, ideas, or requests for AI support. I am happy to work directly with clubs and District leaders to explore how these tools can help advance their goals.

Dan Visone

District 24-L Artificial Intelligence Chair

Helping Lions leverage AI to Serve, Lead and Grow.
